- 39% decrease in lost-time
- 59% reduction in workplace incidents
- 94% decrease in property damage

Help your customers predict who is their highest risk by offering them a free SQ or DSQ trial today!

"We have been extremely pleased with the Safety Quotient assessment. It's quick and easy to use but most importantly it works. Our injury rate has dropped 80% over the past two years, and that is in part due to the SQ™ and the business intelligence and decision support that the reports give us.

I'd recommend it for any progressive leader looking for gains in their safety program."

CHRIS HAYMAN, PRESIDENT AMERICAS, EMECO GROUP

**Safety
Quotient™**

Safety Quotient™ (SQ™) identifies the personality traits (impulsiveness, distractibility, rule-resistance, irritability, etc.) that lead to human error and preventable workplace incidents.

The SQ™ provides feedback for personalized onboarding and training to ensure your candidates and employees make safe workplace decisions.

**Driver Safety
Quotient™**

Driver Safety Quotient™ (DSQ™) provides insight into your candidates' and employees' default personality and how it affects their driving behavior.

The DSQ™ allows managers to provide personalized coaching tips relevant to their risk-areas.

Fleet Managers can reduce the number of traffic tickets their drivers receive! In an independent study, Rule-Resistant drivers received nearly **5x** more traffic tickets and were **2.3x** more likely to cause accidents on the road. Use DSQ to show them who the Rule-Resistant drivers are!
